## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 101***

Section 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-7, 9-14 and 16-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed towards data processing and computer program per se which does not constitute a statutory process, machine, manufacture, or composition of matter. Furthermore, the claims fail to tie the process to another statutory class or identify an apparatus that accomplishes the method steps. Furthermore, the claims fail to provide a useful, concrete tangible result.
